Section-B

Ans-1

O/p:-
A
D
C
B

2. Synchronous ^{promise} execute first. So A and D are execute. ^{promise} Callback (microtask) execute before timer callback, so C comes next followed B from set timeout.

Ans-2

```
function add(a,b){  
  return a+b;  
}
```

```
function subtract(a,b){  
  return a-b;  
}
```

```
{  
  module.export = {  
    add  
    subtract  
  }  
};
```

```
const {add, subtract} = require('./calc')  
console.log(add(4,5));
```

O/p:- 9

Ans-3

```
const Express = require('express');
```

```
const app = Express();
```

```
app.use(express.json());
```

```
let book = [
```

```
{id: 1, title: 'Book one', author: 'John Doe'}
```

```
{id: 2, title: 'Book Two', author: 'Jane Smith'}
```

```
];
```

```
// get
app.get('/api/books', (req, res) => {
  res.status(200).json(books)
});
```

```
// post
```

~~const~~

```
app.post('/api/books', (req, res) => {
  const {title, author} = req.body;
```

```
  const newBook = {
    id: book.length + 1,
    title,
    author
```

```
  };
  books.push(newBook);
  res.status(201).json(newBook);
});
```

```
// delete
app.delete('/api/books/:id', (req, res) => {
  const id = parseInt(req.params.id);

  const index = books.findIndex(book => book.id ===
  if (index === -1) {
    return res.status(404).json({
      error: "Book not found"
    });
  }

  const deletedBook = books.splice(index, 1);
  app.listen(5000, () => {
    console.log('Server run on port 5000');
  });
  200 - Successful (Get / delete)
  201 - book successfully created
```

404 - book ID Not found.

Date: / /

Ans Bug 2

If book doesn't exist, book become undefined

∴ book.title cause an error because title can't be access from undefined

Code

```
app.get('/api/book/:id', (req, res) => {  
  const book = book.find(b => b.id === req.params.id);
```

```
  if (!book) {  
    return res.status(404).json({  
      error: 'Book not found'  
    });
```

```
  }  
  res.status(200).json(book);  
});
```

Ans 7

The react app and Express Api run on different origin (localhost:3000 & localhost:5000). Browser enforce CORS restrictions, while postman does not enforce the browser's same-origin policy. Origin policy.

Express fix :-

∴ first install CORS!
npm install cors

∴ Then :-

```
const express = require('express');  
const require cors = require('cors');  
const app = express();
```

Date: / /

```
app.use(cors {  
  origin: 'http://localhost:3000'  
});  
app.use(express.json());  
app.listen(5000, () => {  
  console.log('Server run on port 5000');  
});
```

It allow request from your React development
Server at http://localhost:3000
